SEALED DEEP CYCLE POWER

A full array of sealed AGM deep cycle batteries that match our flooded battery sizes & capabilities.

Customers are often frustrated by the limitations of flooded deep cycle battery technology. Flooded batteries require maintenance that can be expensive and time consuming to perform – operating pressures that stand in the way of productivity and growth.

To Crown, refining our products to be the best they can be is an integral part of our culture. Our engineers are continually expanding the “value delivered” to our customer in every way, every day. Take our sealed AGM deep cycle batteries, for instance. The batteries work dependably. They answer all the world’s needs for sealed deep cycle battery technology. And they respond to every application challenge with an intelligent solution.

Crown’s success is rooted in an innovative value proposition, and we are continually pushing forward in the “value” frontier. Today... we’ve enhanced our Embassy Products with state-of-the-art engineering. Tomorrow...we find out what the world market really needs.

The Power Behind Performance

The Crown mission: Develop superior products that satisfy customer needs...which distances us from the battery industry.

- ▶ Sealed
- ▶ Clean
- ▶ No Maintenance
- ▶ Universal Fit & Charge Profile
- ▶ Heavy Duty Construction
- ▶ Proven Performance
- ▶ And More...

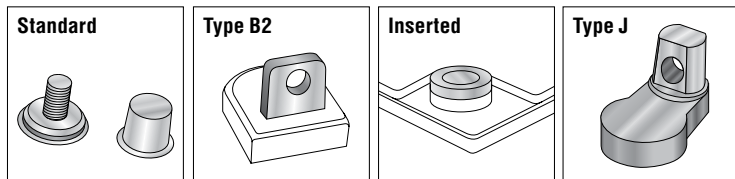

SEALED DEEP CYCLE POWER
